

Loftin Equipment Company proudly serves the entire State of Texas!

Since 1976 Loftin Equipment Company (www.loftinequip.com) has been dedicated to Kohler Power Systems and the power generation industry. In that time, we have built a strong, financially secure company beginning with our corporate facility located in Phoenix, Arizona. We have full service branches located in Las Vegas, San Antonio, Austin, Houston, and **Dallas (New 2010)**. Each facility is a full service branch offering sales, service, parts, and rental.

Loftin Equipment Company is the exclusive Kohler Power Systems distributor for **All of Texas (previously South Texas since 2003)**, Arizona, New Mexico and Southern Nevada. Kohler is a worldwide leader in the manufacture and supply of on-site power generation equipment and accessories.

Kohler Power Systems generator line ranges from 2.5kW to 3,250 kW. They manufacture high quality on site emergency standby, prime, industrial mobile, residential, and marine generators. The offering includes components such as controls, transfer switches, switchgear, tanks and enclosures. We encourage you to visit www.kohlerpowersystems.com for more information.

Our People

Loftin Equipment prides itself on having quality, knowledgeable, and integrity filled employees that have served the great State of Texas and the power generation industry for over 30 years. Mark Loftin (President), John Haney (Vice President and General Manager), Bryan Dietert (TX Industrial Sales Manager), Gary Simmons (Consumer Sales Manager), and Mark Hardwick (TX Service Manager) have all been serving the Texas market for a number of years.

We have added experience in our Sales, Service, and Parts Department as well. Russel Bowling (Sales-Dallas), Askelon Sandle (Sales-Dallas), Dale Grimes (Sales-Houston, previously Dallas), Rob Kurz (Service Sales-Dallas), Tom Wieghard (Service Sales-Houston), Alton Dancer (Parts-

Houston) are all very knowledgeable about what it takes to sell Kohler products and produce in Texas.

Rental Equipment

Loftin Equipment Company has partnered directly with Kohler Rental Power (KRP) to offer a full fleet of diesel, sound attenuated rental generators. Sizes range from 15 Kilowatts to 2 Megawatts and are made up of top-of-the-line products. To compliment the fleet, we also offer a complete line of transformers, distribution panels, cable, disconnects, automatic transfer switches, load banks, and electrical power accessories. Our reliable equipment is often seen at festivals, stage shows, manufacturing plants, special events, disaster relief sites, or anywhere that supplementary electrical power is required.

Parts and Service Capabilities

Loftin Equipment Company is well known for fast and efficient service. All technicians are thoroughly trained professionals. Each of our facilities offers 24-hour emergency parts and service, preventative maintenance programs, load bank testing, wireless monitoring, and fuel cleaning. Whether a customer needs an oil change or an emergency repair, the outcome is the same, quality service. Our preventative maintenance programs enable us to correct minor problems before they become major. Our load bank testing is the ideal way to be certain your standby generator will perform at its full rated capacity. To summarize, our services will insure your system is running 24/7/365.

Customers

You will find our customer base as diverse as our product offering. Whether you are at a festival or an outdoor concert, it's likely we're providing the temporary power. Next time you're using the Internet or telephone, watching television, or listening to the radio, it is probable that we have provided the backup power. Sure, we provide backup power for hospitals but you will also find us at your Local Bank, Fire Station, 911 Center, Public Utility, Toll Plaza, University, Refinery, Casino or your neighbor's boat and home.

We encourage you to visit our website at www.loftinequip.com which offers additional information on our capabilities. Please contact us at the branches listed below for any of your power generation needs.
